PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering graduate (2026) with hands-on experience in cloud computing, DevOps practices, and software development. Built and deployed a cloud-based file upload application on AWS using EC2 and S3, applying IAM roles, security groups, and Node.js. Completed a DevOps internship covering Linux administration, Git, Bash scripting, Apache web hosting, and CI/CD automation. Also developed an ML-powered real-time yoga posture analysis system using CNN and MediaPipe. Seeking an entry-level Cloud Engineer or DevOps role to contribute to scalable, automated infrastructure.

TECHNICAL SKILLS

Cloud Platforms: AWS — EC2, S3, IAM roles, Security Groups, Amazon Linux

DevOps & CI/CD: GitHub Actions, CI/CD pipelines, Docker, automation workflows

Linux & Scripting: Linux/Unix administration, Bash scripting, user management, file permissions, Apache

Version Control: Git, GitHub — branching, pull requests, merge, conflict resolution

Languages: Python, Bash, Node.js (Express), Java, C, HTML

ML & CV Libraries: CNN, MediaPipe, OpenCV, Machine Learning

Tools: SSH, PM2, Multer, AWS SDK, VS Code, UI/UX Design principles

PROJECTS

AWS File Upload Application | Personal Cloud Project | 2025 – 2026

Node.js, Express, AWS EC2, S3, IAM, Security Groups

- Built a full-stack cloud file upload web application — users visit a webpage served by a Node.js/Express app on an EC2 instance and upload files directly to an S3 bucket
- Configured an IAM role attached to the EC2 instance to grant S3 access without hardcoding credentials — applying the principle of least privilege
- Set up EC2 security groups as a virtual firewall — restricted SSH (port 22) to a specific IP and opened port 3000 for public web access
- Installed and configured Node.js on Amazon Linux 2023, deployed the app using PM2 for persistent process management
- Used multer-s3 middleware to stream uploaded files directly to S3 without writing to EC2 disk — improving efficiency and separating compute from storage

Real-Time Yoga Pose Detection & Correction System | Personal Project | 2025 – 2026

Python, OpenCV, MediaPipe, CNN, Machine Learning

- Developed a real-time computer vision application that detects yoga poses from a live camera feed and provides posture correction feedback to the user
 - Integrated MediaPipe to extract 33 human body landmarks per frame, computing joint angles for accurate pose analysis
 - Trained a CNN model to classify yoga poses based on landmark coordinates and compare against ideal posture angles
 - Used OpenCV for video capture and frame processing; designed modular architecture for easy extension with new pose classes
 - Iterated on model accuracy by tuning hyperparameters and refining training data to reduce false positives
-

INTERNSHIP EXPERIENCE

DevOps Intern | Techcake | 3 Weeks

- Administered Linux/Unix systems — created users, managed file permissions, and configured server environments
- Hosted static web pages on Apache HTTP Server, configuring virtual hosts and managing the httpd service with systemctl
- Wrote Bash automation scripts for routine server tasks, reducing manual operational effort
- Applied Git best practices — branching, merging, pull requests, and version control workflows for collaborative development
- Built CI/CD pipelines using GitHub Actions — automated testing and deployment triggered on push events to GitHub repositories
- Gained foundational exposure to Docker containerization concepts and cloud deployment strategies used in production

EDUCATION

Bachelor of Technology – Computer Science and Engineering | Vimal Jyothi Engineering College, APJ Abdul Kalam Technological University | 2026

Relevant coursework: Operating Systems, Computer Networks, System Architecture, Data Structures & Algorithms, Software Engineering

CERTIFICATIONS & TRAINING

- DevOps Internship Certification – Techcake (CI/CD, Linux administration, Bash scripting, Git, automation)
- AWS Cloud Project – File Upload Application using EC2, S3, IAM (self-directed, 2025)
- UI/UX Design – 7-Day Online Course – Pancelab

SOFT SKILLS

Strong problem-solving | Debugging & troubleshooting | Team collaboration | Leadership | Fast learner | Effective communication

LANGUAGES

English – Professional working proficiency | Malayalam – Native
